

Historical relationship builds quality that lasts

Trojan Plastics are the largest bath manufacturer in the UK and one of the leading bath manufacturers in Europe. With a wide selection of styles and designs to choose from, Trojan can offer a high-quality bath to suit every taste, budget and bathroom size. Today, Trojan produces a substantial range of bath and panel designs for a wide and varied customer base.

Data-driven insights

Operating from Milnsbridge, Huddersfield, West Yorkshire, the manufacturing site has undergone a sustained and continued investment programme in modernising old mill buildings and the manufacturing equipment used to produce a quality product.

MPM has been a supplier to Trojan since 1978 and continues to do excellent business together. Since Trojan was founded in 1975, the company's philosophy has remained the same: to produce a quality product using the best possible materials. This philosophy has led Trojan to continue working with MPM, which delivers high quality and the best service on all orders.

MPM supply Trojan with several products, both bespoke and mass-produced items.

EXTRA HIGH-QUALITY FINISH

Over the years, MPM has supplied Trojan with varying bath panel designs in GRP for the premium end products and produced over 30,000 fully wrapped round bath panels, allowing Trojan to maintain their high-quality offering Europe-wide. Also supplied are patterns, jigs and moulds for shower trays, which Trojan uses to produce the finished product. Each time a new design is launched, MPM are quick to make the new patterns, moulds and masters on time and to the exact high-quality finish.

The two companies continue to work closely together to ensure the correct solution and high-end products are provided, and the relationship between the two companies could not be better.

"In over 30 years of trading with MPM, I have never had cause to question or fault their quality and service. There was a seamless transition when Ben took the business over from his father in 2010, and the team at MPM continue to invest in the future providing services such as CAD, CNC machining and 3D scanning capabilities, which gives us the drive to grow our businesses together. Backed up by quality products, service and advice, we feel confident about the future together."

David Mosley - Managing Director

"We prefer to work with family-run businesses because decisions are made quicker, they are passionate about their businesses and are dedicated to mutual growth. We also have the policy to work with local companies to safeguard the environment."
